Hi Darryl,
Unfortunately we cannot commit to assisting you at this time. We only have the resources
scheduled to cover the perimeter.
If something changes I will let you know.
Have a good day,
Carrie

Subject: FW: Slow Roll in Emerson at the Canada/US border
Hello Sir / S/Sgt. Kennedy,
The Emerson Detachment is requesting Traffic Service assistance with a planned Trucker Protest this
Saturday, January 29th at the Emerson border crossing on Hwy 75. The event is similar to one that
occurred earlier this month. We are looking for support with monitoring and directing traffic flow in
that area throughout that day to ensure the road safety of the public. Please let us know if you
would be able to assist.
If you have any questions or concerns, please contact MED or Sgt. Vrooman for more details.
Thanks,
Darryl

Subject: Slow Roll in Emerson at the Canada/US border

Gents,

FYSA

I had a conversation with **Personal Info** from RM of Stanley as he is one of the organizers for the slow roll planned for this weekend.

He provided the following information.

- They plan to start Saturday morning at 0500hrs.
- Then plan to be in the area for a couple of days.
- The plan is to slow roll like they did the last time
- All emergency vehicles will be given clear path to travel.

Social media posts indicate that the group plan to come to a complete stop. When I asked about the complete stop he indicated that it may be something they are planning. There is apparently a similar plan from the US truckers on the south side of the border. Their plan maybe to stop traffic on both sides in a sign of unity between the truckers.

I explained to him the consequences under the Criminal Code and Highway traffic Act that they would be contravening in addition to the potential penalties.

Persc was advised that there would be visible police presence.

We also discussed how their message is causing issues for other trucking colleagues and the ripple effect it would have.

I discussed some options that the group should consider, such as stopping for a few minutes together and then continue with the slow roll. He really liked this idea and will consider it. Similar to the SCO round dance.

I plan to be in contact with **Persc** today again to get a better idea of their plan. The group had a significant following when they conducted the slow roll last week. And with the growing support from the Freedom CONVOY, the potential for more supporters is definitely a possibility.

Planning:

- I intend to contact media to have them broadcast a messaging to expected delays over the weekend and have travellers take alternate routes to avoid the area.
- Potential signage from MIT in St Norbert and highway 14 to expect delays at the US CANADA border.
- I would request additional resources through INSP TELUS (traffic).. Let me know if this something MED would like to do or if you are comfortable with the request from me.
- DOT/MCEO – I will be in contact with motor carrier enforcement to advise them of the protest and potential resources.
- Contact with the IC of CBSA Commercial Port of Entry and they can liaise with the US port.

For your review and input.

Jay
